Redkite Systems
PDS for Airport Training

99% UK Airport RFFS
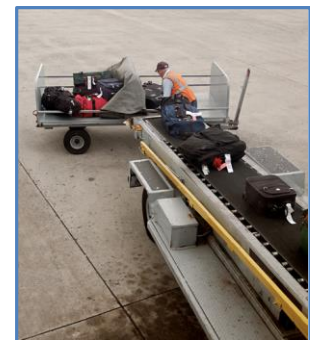

PDS Airport Wide Training

Redkite PDS is now in use in many and all departments in a growing number of airports in the UK. The system is tried and tested, robust, scalable, auditable, web-based and will automate many time consuming paper based processes. Redkite PDS will help you meet the requirements for oversight inspections and provide a robust audit trail showing all training and development activities undertaken by staff.

Redkite Systems has a proven track record in UK airports. We supply 99% of the Airport Rescue and Fire Fighting Services in UK Licensed Aerodromes (CAT 2 and above) and our products have proved to be invaluable to our clients. The airport wide version of this system is ideal for all airport roles including:

- ✓ Airside driving
- ✓ ramp operator
- ✓ aircraft handler
- ✓ aircraft loading officer
- ✓ baggage handler
- ✓ passenger transfer driver
- ✓ cargo deliverer
- ✓ airport ramp assistant
- ✓ ramp agent
- ✓ aircraft loading supervisor
- ✓ air traffic control
- ✓ security
- ✓ plus many other roles and functions

- ✓ Automates many of the time consuming paper based processes when planning and managing training and development events across airport departments.

- ✓ Quickly identify when refresher training or workplace re-assessments are due.

We can provide this tried and tested software as a web based solution and if needed provide expertise to help you set up a competence based development program within your airport.

Training management, on-line prospectus, on-line self-assessments, self - learning, training and competence records, training renewal reports plus a host of management reports designed to make your life easier.

Redkite PDS for integrates seamlessly with all other Redkite Systems products and modules.
